B. Sc. Systems Engineering.
University of Lagos

2013 - 2014

A' Levels
University of Lagos

PERSONAL PROJECTS

Barber Salon rating app

A mobile app that allows users to discover salons within a 4 km radius which are ranked based on their user ratings using Bayesian estimate.

- FrontEnd was developed using the Ionic and Angular framework.
- API was designed using NestJs.
- Prototype using Figma.
- Used Google Map API and Firebase cloud storage.
- hosted API on Heroku.

GidiPot mobile app

A restaurant app where you can order foods and beverages.

- The frontend was developed using Ionic and Angular framework.
- Used Capacitor and Cordova to call Native APIs.
- Implemented Pay stack payment API.

Tobs-Project app

An App that assists students by providing them project resources during undergrad projects.

- The frontend was developed using the Ionic and Angular framework.
- Used Capacitor and Cordova to call Native APIs.
- Implemented Pay stack payment API.

Word Battle Game

A multiplayer game where a player has to complete a word before his/her opponent.

- The frontend was developed using the React Native and Expo.
- The backend was developed with NestJs and Socket.io.
